

## Zoning Compliance

§122-305 through 309  
Sketch Plan, Site Plan, and  
Site Plan with Engineering

This Fact Sheet is not a substitute for the ordinance, but addresses common questions about City ordinances. For further information, please call the Planning Department.

All permit applications are available from the Building Department and at [cityofypsilanti.com/permits](http://cityofypsilanti.com/permits).

Completed applications may be dropped off at the Planning Department.

All permits, fees, and factsheets can be found at [cityofypsilanti.com/permits](http://cityofypsilanti.com/permits).

There are four levels of review: **zoning compliance review**, which is a letter from Planning stating your planned use and whether it complies with the ordinance; **sketch plan review**, which is a staff review of a scaled plan you submit that contains certain required information; **site plan review**, which is a scaled plan you submit that's drawn by an architect or engineer licensed in Michigan; and **site plan review with engineering review**, which is a site plan you submit that has to be reviewed by the City's engineer due to certain factors, including changes to slopes, stormwater, or utilities. Generally, per the ordinance, the more complex your project is, the more scrutiny it will receive. If unusual conditions exist, however, the City Planner can determine that your applicant requires a higher level of scrutiny. These reviews are required in order to ensure that all new or changed uses and buildings are in compliance with the Zoning Ordinance, to prevent blight, and to promote development of the City in alignment with the Master Plan.

**Zoning Compliance review** is required when you are planning to change from one permitted use to another permitted use, and are not required under the ordinance to change the building or parking footprint, nor other changes. Often, a letter is not needed, however, lending institutions or other permitting agencies may require one.

**Sketch Plan review** is generally required when an applicant is proposing a change of use from a permitted use to a Special Use, but is not required by the Zoning Ordinance to change the building or parking footprint, and is not requesting any exceptions or waivers as permitted by the Zoning Ordinance.

**Site Plan review** is always required when an applicant is proposing:

- new construction, including some larger accessory buildings;
- an expansion to an existing building, alteration of that building's footprint;
- a change of the use of a building, land, or building and land in combination when that use is more intense than the previous/existing use;
- modifications to a parking lot with more than ten spaces, including reconstruction that involves replacing the subgrade;
- an expansion of a Special Use.

#### **Site Plan Review with Engineering Review**

Some site plans have to undergo a review by a licensed engineer, in addition to staff review. These projects commonly involve, but are not limited to:

- adding impervious surface (buildings, asphalt, etc) where pervious surface (lawn, gravel, etc) used to be;
- adding a tie-in to a public utility, such as stormwater or sanitary sewer, or a change to an existing tie-in;
- modifications within the right-of-way.

In addition to meeting the standards of the Zoning Ordinance, these projects need to meet the City's Engineering Standards, available online. There are three phases of engineering review, each associated with a different fee:

1. Engineering site plan review
2. Detailed engineering review
3. Construction oversight.

## City of Ypsilanti Planning & Development Department

One South Huron • Ypsilanti, MI 48197

### **SITE PLAN REVIEW PROCESS**

If your application is complete and received by 4:00 p.m. on the third Wednesday of the month, it will generally be heard in front of Planning Commission at their regular meeting at 7:00 p.m. in Council Chambers of City Hall on the third Wednesday of the following month. If your application can be reviewed administratively (rare), please allow four to six weeks.

Once your site plan has been approved by the Planning Commission, there are often conditions that need to be met that can be reviewed and approved administratively. You will receive a letter &/or email from the Planning Department detailing a list of any conditions that are outstanding and the next steps. Once final planning approvals have been granted, the applicant has six months to begin the project, or the approvals will expire.

In most cases, the process is as follows:

1. Planning & Development Department receives the application and fees. Applicant will be contacted to confirm that the application has been received within 3-5 working days, and advised if additional reviews, such as variance application, lot split or combination application, or engineering drawings are necessary.
  - If required, submit detailed engineering plans for review. Engineering plans must be approved by the Planning & Development Department before beginning construction.
  - If required, complete and submit Historic District Work Permit Application to the Building Department. Proposed work must be approved by Historic District Commission.
2. Applicant attends Planning Commission meeting at 7:00 pm in Council Chambers of Ypsilanti City Hall. After staff presentation, the applicant will be provided an opportunity to speak on the project.
3. After Planning Commission decision, applicant will be notified of the Commission's decision and the next steps in permitting process, in writing.
4. If detailed engineering review was required, then a preconstruction meeting must be held before beginning construction. Otherwise, once Planning Department approval has been granted, the applicant may seek Building Department and other approvals.
5. Once work is complete, complete and submit a Certificate of Occupancy Application to the Building Department. All Planning & Development requirements must be met. If applicable, Building, Fire, Engineering and Historic District Commission requirements must also be met.

*Note: your project may be subject to applicable provisions of the Michigan State Barrier-Free code and the federal Fair Housing Amendments Act of 1988. If you have any questions about this, please consult your project professional.*

**SITE PLAN REVIEW APPLICATION**  
 INCOMPLETE APPLICATIONS WILL NOT BE ACCEPTED.

**Applicant**

Name		
Address		
City	State	Zip
Phone	Email	

**Property**

Name of project
Address
List all parcel identification numbers included in development
Property owner*
Current use
Proposed use
Current zoning
Legal description of property (may be attached)

\*If applicant is not the property owner: applicant must attach property owner's written, notarized authorization of application.

**Signature**

I hereby attest that the above information is accurate and complete. I am authorized to and grant permission to the City of Ypsilanti staff to access the subject property for the purposes of preparing staff reports and/or evaluating this application.

***You must complete the checklist on the following page before turning in your application.***

## Site Plan Required Information Checklist

This checklist **must** be completed by site plan designer and submitted with site plan review application. The City Planner or Planning Commission may require other data they deem necessary. **Four full-size folded copies of the plans are required, as well as one electronic copy (PDF preferred).**

***The Planning and Development Department will reject any incomplete submission.***

<b>Project-identifying information</b>	
	Name of project
	Brief description of project
	Location map showing major thoroughfares and site location (no scale necessary)
	Name, address and phone number of the site owner
	Name, address and phone number of the developer
	Name, address and phone number of the plan designer and their professional seal
<b>Existing conditions</b>	
	Scale (minimum of one inch equals 200 feet), north arrow, date of original drawing and any revisions
	Area of the site in square feet and acres, excluding all existing and proposed rights-of-way.
	Property lines and dimensions, including lines and dimensions of all rights-of-way & easements
	All structures and accessory structures, their uses and dimensions. These include but are not limited to buildings, signs, drives, parking areas, sidewalks, utilities, lighting, fences, flagpoles, and dumpsters/refuse collection areas.
	Location of abutting streets, existing and proposed rights-of-way, service drives, curb cuts, and access easements serving the site, as well as driveways opposite the site and all driveways within 100 feet of the site. The centerline of road rights-of-way shall be shown.
	Use(s) of existing buildings
	Existing landscaping
	Dimensions of all structures and lot lines within 50 feet of the site
	Existing zoning of the site and all adjacent properties
<b>Proposed conditions</b>	
	Scale (minimum of one inch equals 200 feet), north arrow, date of original drawing and any revisions
	Any changes to site dimensions, and completed <i>Lot Split/Combination Application</i>
	Any changes to zoning, and completed <i>Zoning Map Amendment or Text Amendment Application</i>
	Any variances requested, and completed <i>Variance Application</i>
	Any changes to rights-of-way or easements on the property
	All structures and accessory structures, their uses and dimensions, and addition information that may be required by code. These include but are not limited to buildings, signs, drives, parking areas, sidewalks, utilities, lighting, fences, flagpoles, and dumpsters/refuse collection areas.
	Building floor plans and architectural wall elevations.
	Location and dimensions of any open-air uses, such as outdoor cafes, open-air sales, or outdoor storage
	Parking areas, access drives, or sidewalks, showing the method of surfacing, number and size of spaces, aisles, loading areas, and handicapped access ramps.
	Landscape plan. Existing vegetation that is to be retained on the site shall be shown.
	Direction and method of stormwater drainage, ground elevations of all existing buildings, site contours at 2 foot intervals, drives and parking lots, and any unusual surface conditions. Include the method of collection; the method and location of the connection to existing stormwater system; and first flush method and type of device that is proposed.
	Indicate all areas of this site that are located within floodplains.
	If phased construction is to be used, each phase must be noted and each phase must stand on its own.

Site designer initials: \_\_\_\_\_

## FEE SCHEDULE

### Site Plan Review

Planning Fee: \$500

#### Engineering: Site Review Phase

<span style="background-color: yellow;">Site Plan Review</span>	<span style="background-color: yellow;">500</span>
-----------------------------------------------------------------	----------------------------------------------------

#### Engineering: Plan Review Phase

Construction Estimate Less Than \$50,000	6%; Minimum 500
Construction Estimate Between \$50,000 - \$100,000	5%; Minimum 3,500
Construction Estimate Between \$100,000 - \$500,000	3%; Minimum 6,000
Construction Estimate More Than \$500,000	2.5%; Minimum 12,000

#### Engineering: Construction Phase

Construction Estimate Less Than \$50,000	9.0%; Minimum 1,000 Construction Escrow
Construction Estimate Between \$50,000 - \$100,000	6,000 + 8.0% of amount over 50,000 Construction Escrow
Construction Estimate Between \$100,000 - \$500,000	11,500 + 6.0% of amount over 100,000 Construction Escrow
Construction Estimate More Than \$500,000	35,000 + 5.0% of amount over 500,000 Construction Escrow

**Notes:**

Engineering Site Plan and Engineering Plan Review fees are nonrefundable.  
 Initial Engineering Site Plan Review Fee covers two reviews.  
 Initial Engineering Plan Review Fee covers three reviews.  
 Construction Escrow collected in excess of incurred costs will be refunded upon final acceptance of project.  
 These fees are for the City Engineer only. Additional fees from other City Departments may apply.
