

City of Ypsilanti Neighborhood Intel Open Portal Community Login Directions

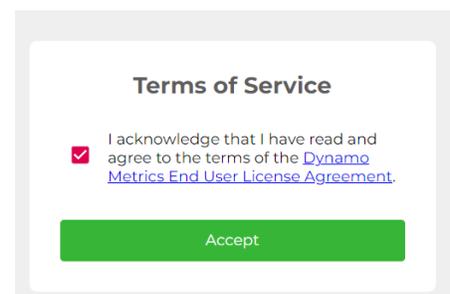

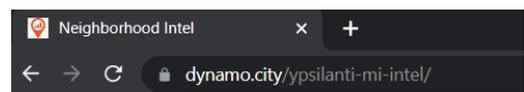

The City of Ypsilanti has partnered with Munetrix to make the Neighborhood Intel platform (formerly DynamoMetrics) available to the community for transparency, data sharing and reporting. Neighborhood Intel helps citizens:

- Explore your city with heatmaps and layers
- Look at US Census block-level data for comparison
- View properties filtered by residential, commercial, tax, and occupancy status or by using built-in heat maps, analysis, and census data layers
- Examine time-series metrics that provide historical, current, and predictive insights
- Search and save data on specific properties by address
- View violations, certificates, permits, and licenses issued to specific properties
- View reports on specific properties and comparison to the city or neighborhood metrics
- Create custom layer maps combining selected data

Create Your Login

- Open an internet browser on your computer. Munetrix supports Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari.
- Go to: <https://www.dynamo.city/ypsilanti-mi-intel/>
- Click the link to read **Dynamo Metrics End User License Agreement**.
- Check the **acknowledgement box** and click **Accept in the Terms of Service box**.

- Click **Create Account**.

- **Enter the requested information.**
- **Passwords** require at least a capital letter and small letter.
- The system will request a phone number to send a text message with a secure 6-digit code. Make sure the phone number you enter is for a mobile phone that can receive text messages.
- Once you complete all of the fields, click **Create Account**.
